Degree Programme in Business Information Technology

Combine business with IT! The degree programme in Business Information Technology provides students with practical professional Business IT skills combined with an extensive theoretical base.

We offer our students courses on the most interesting areas of current IT education.

The IT specialisation areas you can choose as your major and/or minor studies:

Software Development

ICT and Business

Digital Services

ICT Infrastructures and Cloud Services

In addition, studies typically include content and practical application arranged in co-operation with partnering IT and other companies. This collaboration with both local and international companies is an integral part of the degree and enables students to learn the skills and acquire the experience to work in multicultural teams and on multinational projects.

Career plans that include the development of entrepreneurship, and sales and service abilities are strongly supported. Furthermore, the degree offers general courses enhancing other skills required to successfully work in a business environment. These skills are related to areas such as teamwork, communication, and the ability to work independently.
